

# XPI PLAST

**XEMPLARY  
POWER  
INNOVATION**

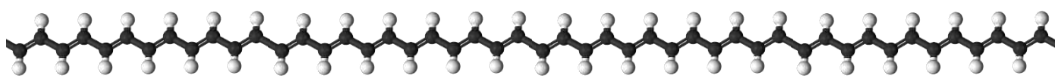

**SPECIALIST  
TO THE GLOBE**

- A KEY LEADER IN SUPPLYING POLYMERIC GRANULES, COMPOUNDS & PRODUCTS
- YOUR PARTNER IN BOOSTING PRODUCTIVITY

YOU **DREAM** IT

WE **BUILD** IT WITH **PREMIUM** QUALITY

XPI PLAST is constantly striving to increase the speed of work by optimizing processes in product supply, using only experts for this work and using challenges as opportunities, which in addition to being the most knowledge-based, has become one of the leaders in supplying of the polymer materials & products and it's an expert company in this industry.

## PE Stretch Films

### Hand Stretch Film :

Considering the use of polymer films as a sustainable solution for packaging, using this type of stretch film has many advantages and is suitable for industries that seek to reduce costs, control various items - not depend on machinery - and be flexible in packaging.

### Machine Stretch Film :

Using this type of stretch film has its own advantages and is of great help to industries that want to increase their packaging and production speed - control the cargo better during transportation and storage - reduce operation time by using automatic and semi-automatic machines.

### Specialty Stretch Films :

As their name suggests, they are produced for industries that require special stretch films for various applications and are produced for conditions or applications that ordinary films are not suitable for, such as silage - colored films, etc.

Film type	Hand Stretch Film	Machine Stretch Film	Specialty Stretch Films
Thickness ( $\mu\text{m}$ )	8 – 35	12 – 50	12 – 50
Width range (mm)	50 – 500	400 – 1500	100 – 1500
Length range (m)	200 – 2000	1000 – 3000	100 – 3000
Number of layers	3, 5	3, 5, 7	3, 5, 7

- Production just is based on your specific needs. The values presented here can be customized according to your requirements.
